No-cue choice cluster co-occurrence – Arcachon

N = 53 subject x city pairs

No-cue choice cluster correlation – Arcachon

N = 53 subject x city pairs; phi coefficient vs. independence

No-cue choice cluster co-occurrence – LaCiotat

N = 43 subject x city pairs

No-cue choice cluster correlation – LaCiotat

N = 43 subject x city pairs; phi coefficient vs. independence

No-cue choice cluster co-occurrence – LeTreport

N = 38 subject x city pairs

No-cue choice cluster correlation – LeTreport

N = 38 subject x city pairs; phi coefficient vs. independence

No-cue choice cluster co-occurrence – Sete

N = 45 subject x city pairs

No-cue choice cluster correlation – Sete

N = 45 subject x city pairs; phi coefficient vs. independence
